

CROWN COLUMN & MILLWORK

introducing our new

Arts & Crafts Column Collection

Performance  
and Beauty

to last a

LIFETIME

The elegance of the early 1900's squared or tapered column is once again adding drama and personal flare to countless new homes and additions.

Unlike their 100-year old predecessors, these new architectural delights are virtually maintenance-free.

Style and performance for all time... Yesterday, Today and Tomorrow.

- Our new 21<sup>st</sup> century all-weather expanded PVC materials neither split, crack, rot or separate at the joints. In turn, they can be trimmed, drilled and fastened with traditional tools. Their hollow centers not only make them light weight and easy to install, but are excellent as channels for unsightly downspouts, wiring and plumbing.
- Additionally, our special manufacturing processes provide the kind of crisp details you would expect from only the most labor intensive and costly hand work.
- Once installed, simply apply two coats of acrylic latex paint and sit back and enjoy years upon years of carefree Style and Performance for all time.

Available In:

**Non-Tapered**

- Plain (6" -12")
- Fluted (6" -12")
- Raised Panel (8" -12")
- Recessed Panel (8" -12")
