## ER Capital & Base Upgrade

We are pleased to announce that we have upgraded our *Engineered Resin Capital & Base Sets*. They will now be shipped to you with pre-drilled recessed screw holes for easier installation and to allow for immaculate finishing. The conversion to the upgraded product is in process and will be completed with deliveries scheduled the week of July 18<sup>th</sup>. A neon green label will be applied to the box with a list of contents notifying the receiver that the content of the package includes the new version. You may receive old and new versions combined on the same shipments until the week of July 18<sup>th</sup>. All ER Sets will also include an *Installation Hardware Kit* at no charge. The *Installation Hardware Kit* will be included in the ER Set SKU number and will not require a separate line item on your purchase order.

## New Product offering Coming Soon!!!

We will be introducing an ER set with flashing. This product will be available for 6", 8", 10" and 12" round tapered Fiberglass shafts. The sets will include pre-drilled ER capitals and bases, hardware installation kit, and flashing. Our flashing was designed with the closest eye on architectural detail. The flashing fits tightly inside the top of the cap to provide protection and enclosure from the elements, leaves, debris, etc. It fits inside the cap so that the true profile of the Tuscan Order of Architecture is in no way compromised by adding an additional cove molding to the immaculate lines of the Tuscan Capital. We hope you find this addition to our cap and base offering a benefit to your selling needs!

## Crown Column & Millwork Receives Recognition for Professional Builder Magazine's "100 Best New Products 2008" Award

Professional Builder magazine recently honored Crown Column & Millwork's Arts & Crafts Collection with a "100 Best New Products 2008" award. These awards spotlight product innovations and recognize and reward manufacturers that are investing in research and development. The publication noted that the collection is "designed for quick and simple installation for both interior and exterior applications," and "instantly bring ageless appeal to surrounding spaces. The collection comes in multiple dimensions and lengths in both cellular PVC and most wood species." Professional Builder included the award winners in their June 2008 print edition, as well as in the June 13, 2008 Pro Builder Weekly and Custom Builder Update e-Newsletters.
