## Newly Modified "SQUARE<sup>2</sup>" Cast Columns

As many of you know the square column portion of our business is a growing segment. Why? Design trends in the architectural community are somewhat like fashion trends. Sometimes fashion trends take off and become "classics" and part of our wardrobes for years. In the architectural world, design trends sometimes become part of our architecture for centuries. Thanks to our creative and forward thinking architects, designers and specifiers.

The bungalow for instance, first evolved in American architecture in the 1880's and has been reinvented many times over. Classic features include square columns in many shapes, styles and configurations.

In addition to our complete line of *PVC Arts & Crafts Columns*, our *lightweight pultruded square columns*, and our *collection of architectural wood columns* we also offer *square cast columns*.

Crown now introduces the newly modified **SQUARE<sup>2</sup>** cast column. This highly durable cast square column is square on the inside and out, providing a *uniform wall thickness, dimensional stability, and lighter weight cast product*. For a detailed rollout schedule please contact your CSR. The newly modified **SQUARE<sup>2</sup>** column will be labeled for easy identification and all part numbers and prices will remain the same.

## Featured Partner in the Spotlight

# Curtis Lumber Co., Inc.

Curtis Lumber of Ballston Spa, N.Y., has been chosen as the Multi-Unit Pro Dealer of the Year for 2008 by Home Channel News. The 22-unit chain will be honored at the Pro Dealer Industry Summit. Curtis Lumber is a fifth generation business, currently serving the lower Adirondack region, central New York and the Catskills.

Curtis Lumber has been an established and valued Crown partner since September of 2000. We congratulate our friends at Curtis Lumber for a job well done and look forward to building our business together for many years to come! **CONGRATULATIONS!!!**
